

I Claim:

1. A strap for a bow string release comprising:

5 a strap having a first end and a second end;  
said first end of said strap comprising a receiver having an opening for receiving said second end, said opening having an opening width;  
said second end of said strap comprising a member having a width, said member width greater than  
10 said opening width.

2. A strap according to claim 1, the second end of said strap further comprising an elastic member coupled with said member.

3. A strap according to claim 1, the strap  
15 further comprising a clip coupled to said strap, said clip being coupled with the second end of said strap.

4. A strap according to claim 1, the strap further comprising a clip coupled to said strap, said clip being selectively coupled with the second end of  
20 said strap.

5. A strap according to claim 1, the strap further comprising a clip receiver coupled to said strap, and a clip coupled to said clip receiver.

6. A strap according to claim 5 where said  
25 clip is movably coupled with said clip receiver.

7. A strap according to claim 1, said second end of strap further comprising at least one hole provided on said strap, said hole selectively receiving a pin coupled with said receiver on said first end of said  
30 strap.

8. A strap according to claim 1, wherein said member is triangular.

9. A strap according to claim 1, said strap being formed from a first padded layer coupled to a  
35 second non-stretchable layer.

10. A strap according to claim 9 the strap further comprising a third layer coupled with said second layer.

11. A strap according to claim 9, wherein  
5 said second layer is formed of a ballistic material.

12. A strap according to claim 1, said strap comprising a substantially v-shaped pattern.

13. A strap according to claim 1, said tab comprising a substantially triangular pattern.

14. A strap according to claim 1, said strap  
10 coupled to a bow string release mechanism.

15. A strap for a bow string release comprising:

a padded layer;  
15 a substantially non-stretchable layer coupled with said padded layer.

16. A strap for a bow string release according to claim 15, said strap further comprising a third layer coupled with said substantially non-  
20 stretchable layer.

17. A strap for a bow string release comprising a substantially v-shaped strap having a first end and a second end, said second end being provided with a means for maintaining the second end in a semi-closed  
25 position relative to said first end.

18. A strap for a bow string release comprising a first end of said strap, a second end of said strap, said first end and said second end in a semi-closed relationship.

19. A strap according to claim 18, said first  
30 end and said second end further forming a closed relationship.
